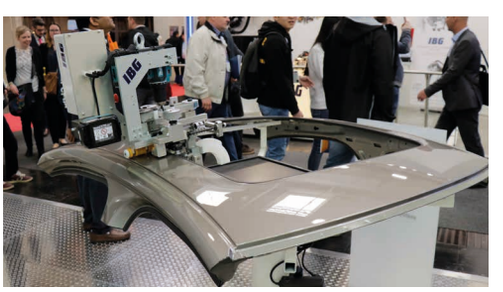
HANNOVER FAIR **SPECIAL EDITION 2019**



Semi-automated sealing application

Large crowds of visitors at the IBG trade fair stand.

The R&D project „3DProCar“ is a magnet for visitors and a technical highlight at this year‘s stand. IBG developed a robotic cell for automated preforming in cooperation with twelve partners from science and industry. With the help of ten industrial robots, CFRP textiles made of recycled carbon are processed, draped and shaped.
